Contact us

The P2R A70 PRO brings together the key features riders expect from a premium aero road helmet — wind tunnel testing, Mips® technology, Virginia Tech 4-Star rating, airflow, comfort, and fit — without the premium price.

Tested at the Silverstone Sports Engineering Hub in the UK, the A70 PRO was evaluated across multiple yaw angles and riding speeds from 35–45 km/h to better reflect how riders actually experience wind on the road.

Lower CdA means less aerodynamic drag. Less drag means less energy needed to hold speed — helping riders stay more efficient during fast training rides, group rides, solo efforts, and race-day pushes.

For protection, the A70 PRO is Mips® equipped and Virginia Tech 4-Star Rated, giving riders an independent safety reference alongside aero performance.

With a 9-vent airflow system, Ionic+® antibacterial liner, and secure adjustable fit system, the A70 PRO is built for real road riding: fast, practical, comfortable, and priced for more riders.

A70 PRO Helmet

Built for speed. Engineered for performance.
Optimized aerodynamics for every ride.

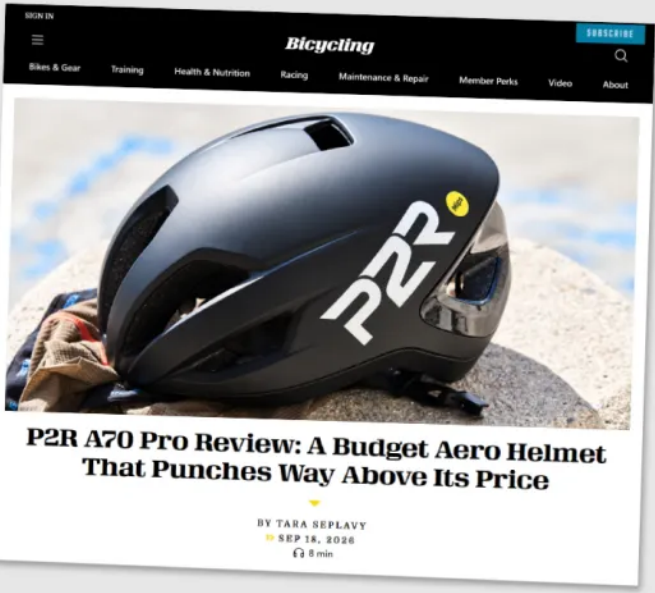

AS TESTED BY

Bicycling

By Tara Seplavy
Deputy Editor

"This A70 punches far above its weight class and **has no business being this good**. It somehow combines **wind tunnel-proven aero, a top-scoring Virginia Tech safety rating**, and at a price that makes you think why other brands are asking triple the price."

VIRGINIA TECH. HELMET RATING | SILVERSTONE SPORTS ENGINEERING HUB | **\$99**

P2R A70 Pro Review: A Budget Aero Helmet That Punches Way Above Its Price

BY TARA SEPLAVY
SEP 18, 2026
6 min

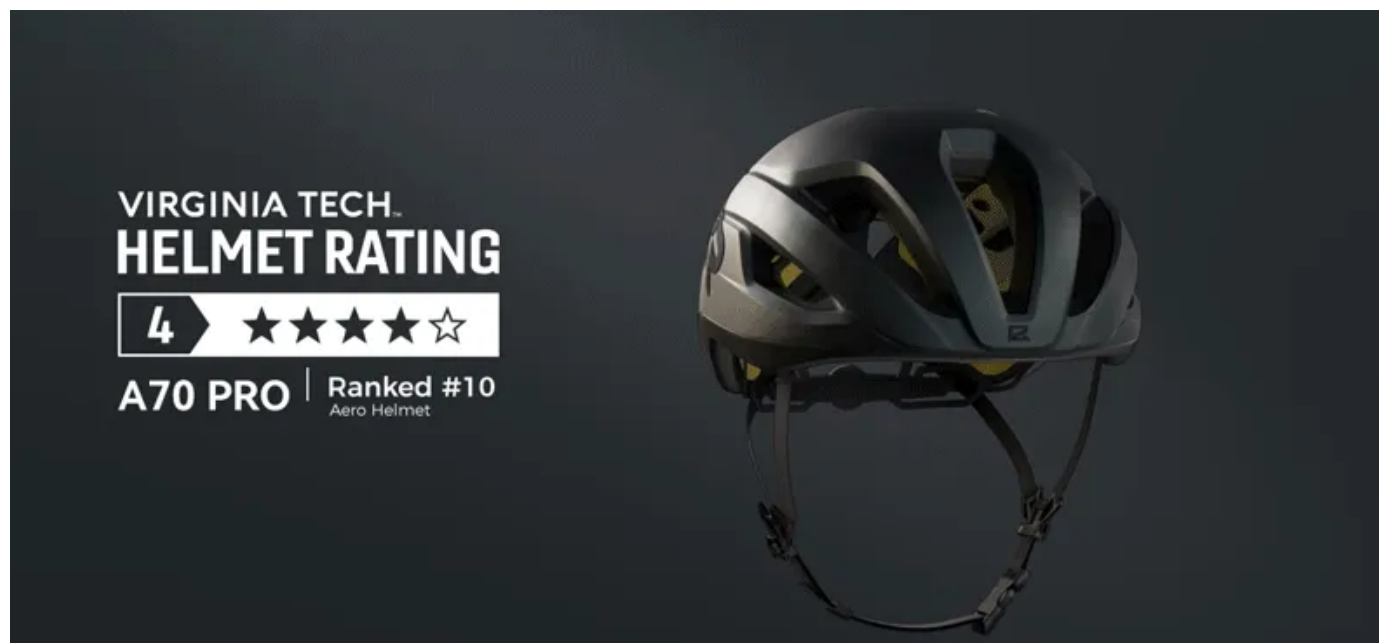

Tested. Reviewed. Impressed.

Bicycling put the A70 PRO to the test and found a helmet that punches far above its weight class. From wind tunnel-proven aero and trusted protection to premium fit and a \$99 price, the A70 PRO delivers performance beyond expectations. [Read the Full Review →](#)

Built Beyond Expectations

Wind tunnel tested. Virginia Tech Helmet Lab recommended. Mips® equipped. Built to deliver more for every dollar spent.

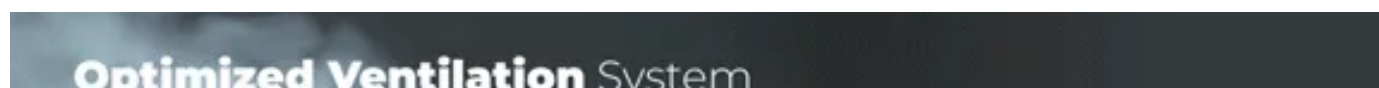

Trusted Protection

Recommended by the Virginia Tech Helmet Ratings, the P2R A70 PRO earned a 4-Star rating, ranking #101 among more than 300 helmets tested and placing among the Top 10 aero road helmets evaluated.

Wind Tunnel Tested at Silverstone

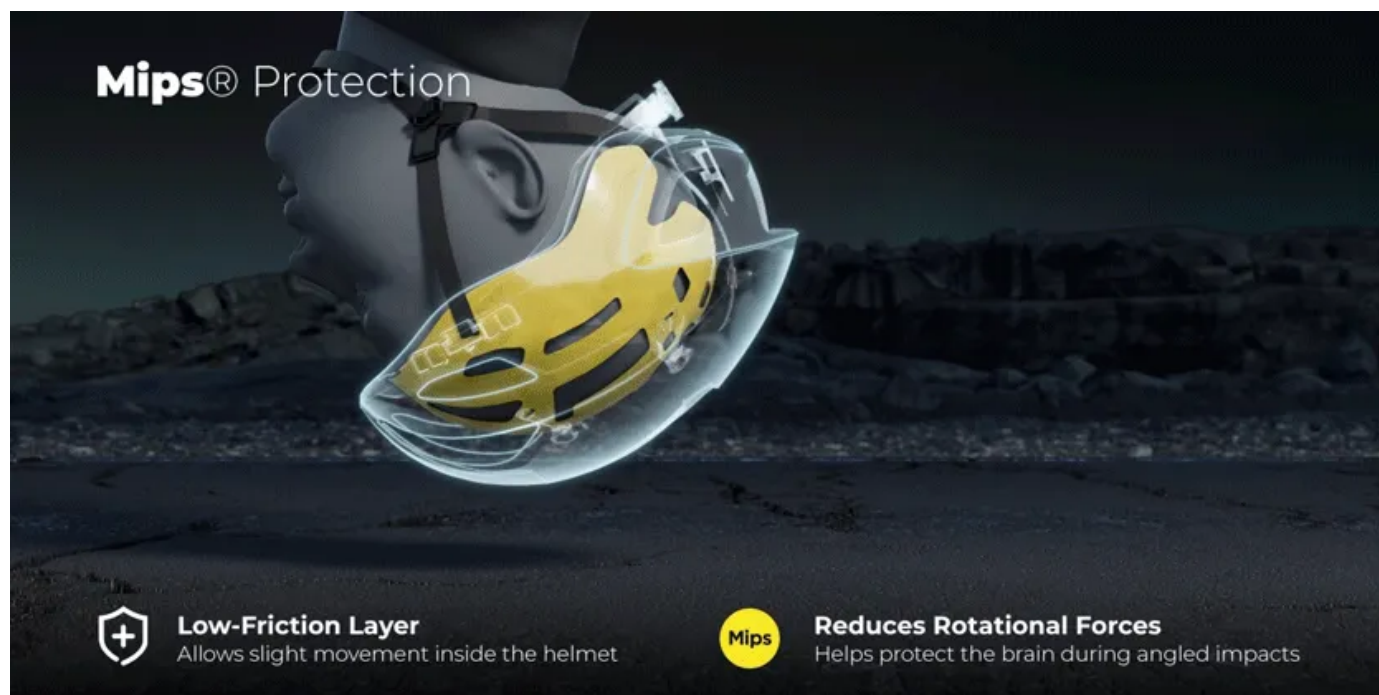

Tested at the [Silverstone Sports Engineering Hub, UK](#), where the A70 PRO demonstrated aerodynamic performance comparable to some of the industry's leading aero helmets.

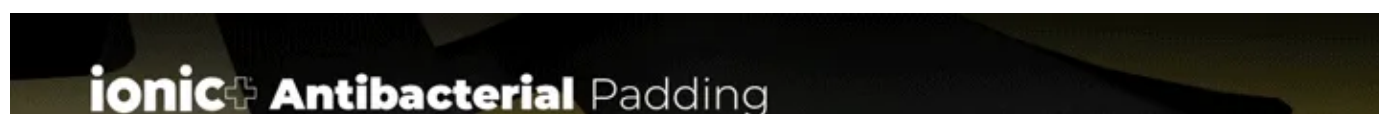

9-Vent Airflow System

A combination of intake and exhaust vents creates efficient airflow, keeping your head cool in both high-speed and low-speed riding conditions.

Mips® Technology

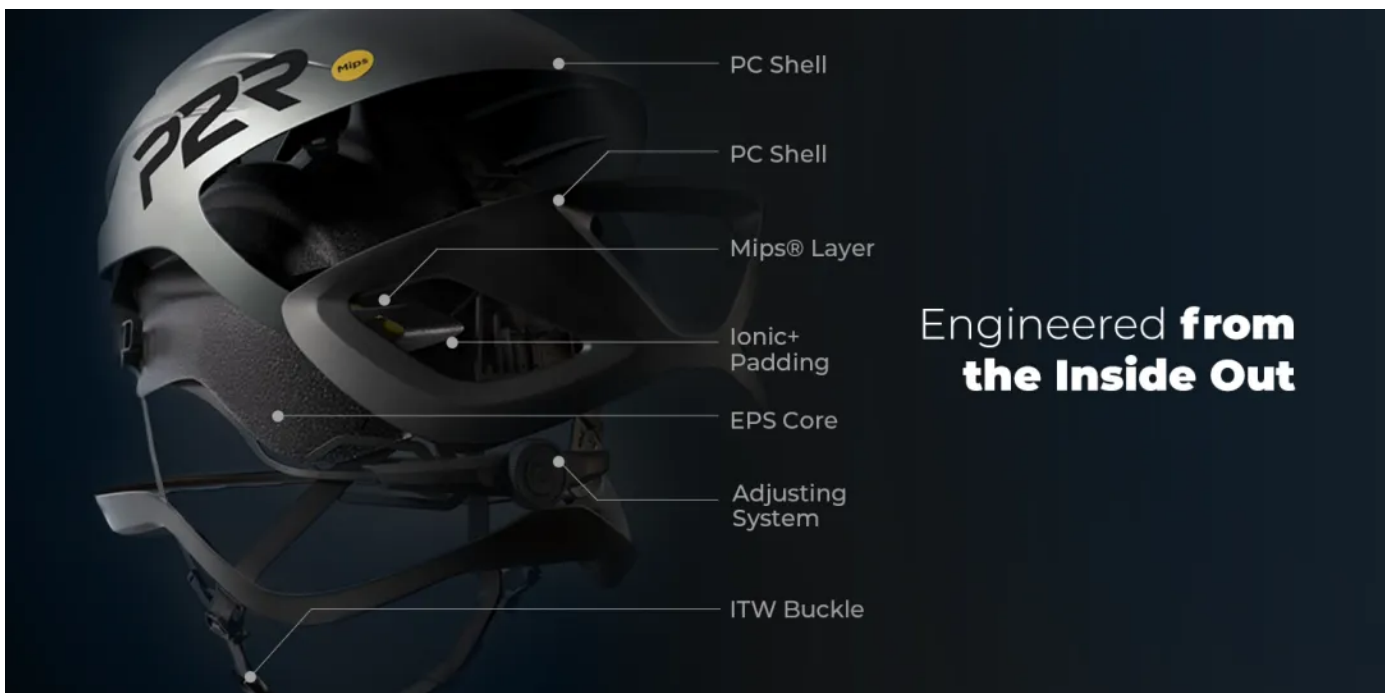

P2R helmet features MIPS technology to reduce rotational forces during impacts, providing extra protection on the road so you can ride with confidence.

Ionic+® Antibacterial Padding

Breathable and moisture-wicking padding helps keep you dry and fresh throughout every ride.

Engineered from the Inside Out

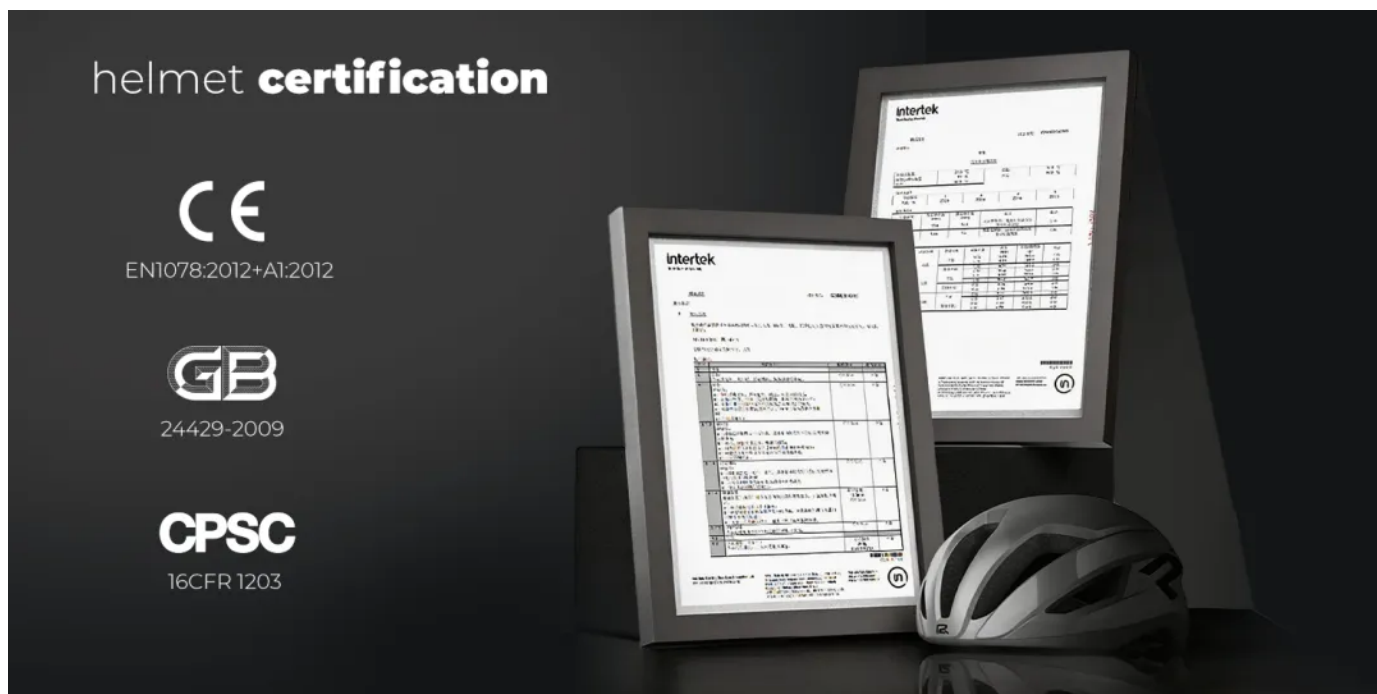

Every layer works together to enhance safety, fit, and performance so you can ride with confidence.

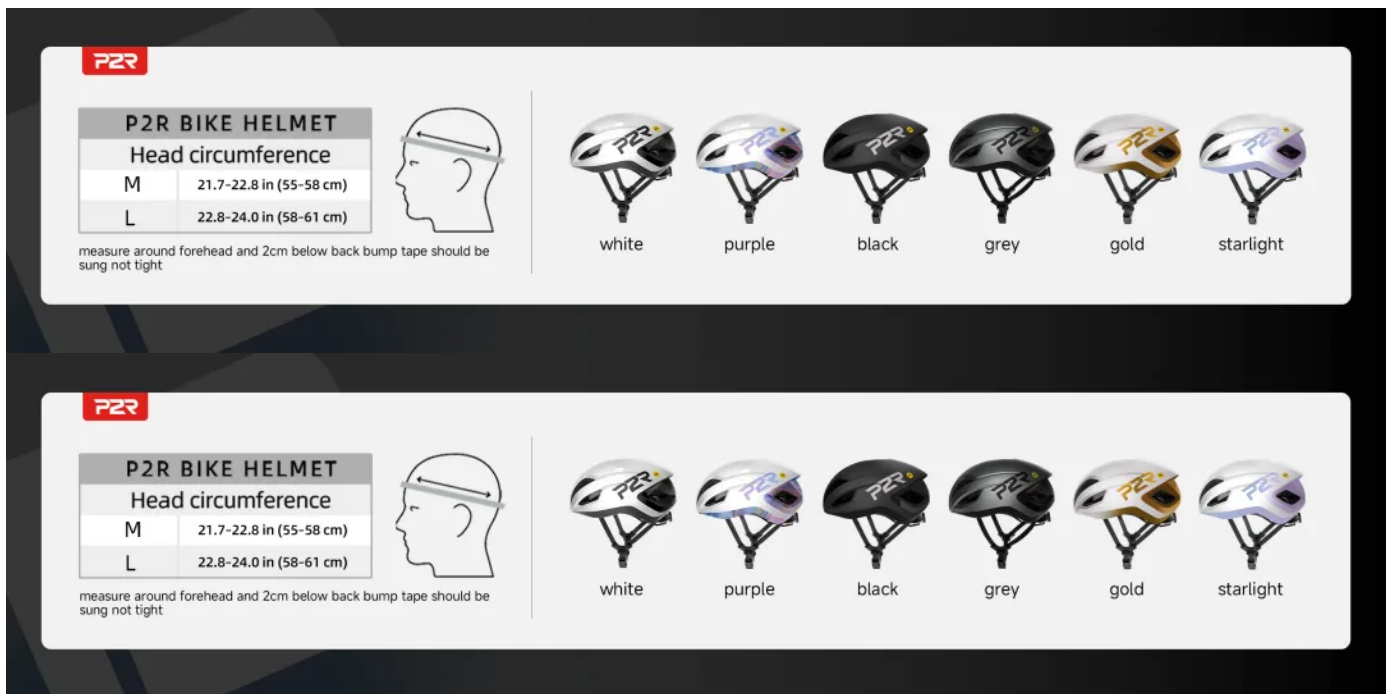

Ride Longer, Stay Cooler

A lightweight construction that enhances comfort and performance on every ride.

Safety Certified

Tested and certified to CE, GB, and CPSC standards for proven protection in real-world scenarios.
