

TIME

Got a sudden assignment in the other part of town? Have a spontaneous coffee, a workout after work, a quick shopping spree?

When each of your days is filled to the brim, you want the best mode of transport to accompany you. Speed, reliability and style come together in our premiere urban bike series. It is the TIME for something new!

We have opted for maximum efficiency without compromise. Intuitive frame construction of lightweight, durable aluminium is backed by a lifetime warranty. We have designed it with full speed and comfort in mind, wherever you go. This comfort is priceless in the dynamically changing conditions of each day.

Speed and safety - that's just the start!

Bet on functionality - each model of the TIME series will follow your needs and expectations. You want to put a rack on? Front or back? Is today's weather telling you to have mudguards on, or will you ride without them? Numerous accessory mounts give you complete freedom to choose your parts.

Each of the TIME series models is equipped with a sporty saddle, powerful disc brakes and 1x drive.

Especially for you we have redesigned the ROMET MISTRAL model, available in three sizes, two colours, and two versions of equipment and geometry. Choose the perfect fit and decide whether you prefer a classic frame or with a lowered cross bar.

The second novelty is the ROMET WICHER 2022 model, a classic in a modern edition. The minimalist design ensures a fast, trouble-free ride.

We also introduce the folding ROMET WIGRY 2022 models, ready to accompany you anywhere in the world - always with the same reliability. The compact design means you can easily fit your bike in the boot of a car or take it on a long-haul flight.

Choose from the bikes that will always keep pace with you!

PAINTING TECHNOLOGY

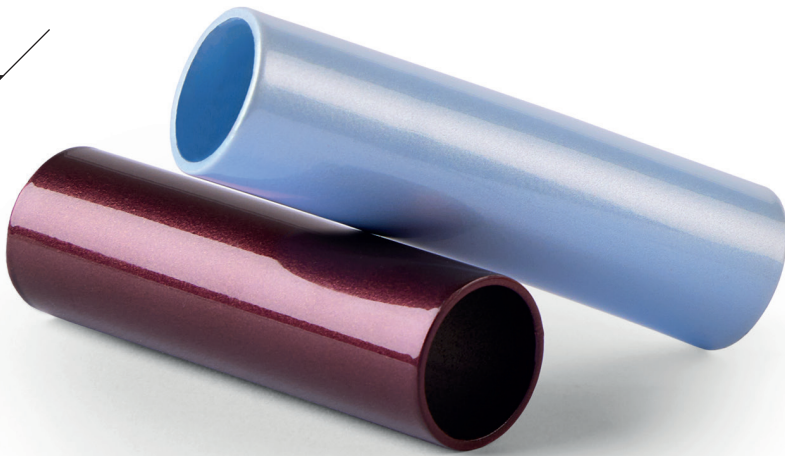

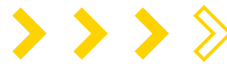

The ROMET CITY 2022 collection consists of outstanding, distinctive bikes. To maintain the highest quality and unique design, we have used advanced manufacturing processes.

Among the advanced technologies used by Romet, a new painting technology deserves special attention. The base is the liquid painting method, which gives practically unlimited possibilities of choice and application of colours. We exploit this potential by selecting stylish, unique colours that perfectly reflect the features of the bike. What distinguishes us in the market among bicycle manufacturers is the painting technology. The acrylic used to cover the paint is an extremely damage-resistant layer that perfectly protects against external factors. Additionally, the crystal clear acrylic coating brings out the depth and nobility of the colour.
