

Cariboo Magnesium Max (mint-black) Balance Bike

Cariboo Magnesium Max Mint-Black is an uncompromising magnesium balance bike for children whose parents prioritize comfort and modernity. Our flagship model, equipped with 12-inch pneumatic wheels and a monolithic, weld-free frame, ensures a smooth ride even on uneven terrain. With saddle and handlebar adjustments, the Magnesium Max grows with your child, taking care of their comfort and proper posture.

Sunny energy on two wheels! The Lemon-Blue gradient combines bright lemon with sky blue. This color scheme not only looks great in photos but, most importantly, makes your child perfectly visible during daily walks to the park or forest.

LITE type tires

- **Why is it important?** It's not hard foam, but a lighter version of a classic pneumatic tire.
- **What does it provide?** Full cushioning and rubber grip without the typical weight of air-filled tires.
- **The difference:** Softness and traction without the extra bulk.

V-brake: A safe start

- **Why is it important?** Safety is key when speed increases.
- **What does it provide?** Teaches braking habits and saves shoes. The lever is perfectly sized for tiny hands.
- **The difference:** A functional educational tool for future cycling.

Magnesium frame: Optimal 3.6 kg

- **Why is it important?** Ease of use for both child and parent.
- **What does it provide?** A weld-free, durable, and manageable frame.
- **The difference:** Our most high-tech construction.

Lightweight choice

The magnesium frame offers all the top solutions from our products while maintaining low mass. The Magnesium Max is light enough that learning to balance becomes natural and completely stress-free for the child.

V-brake system efficiency

Give your child the control they need. The V-brake allows for quick reaction in any situation, teaching the toddler responsibility and riding technique from an early age.

Maximum grip

Spoked wheels with pneumatic Lite tires are a lighter alternative to classic rubber wheels. The extensive tread provides a soft ride without shocks and confidence in turns, regardless of the surface.

Stiffness and durability

The A-Head stem is a proven construction from MTB bikes. It ensures precise maneuvering and allows for a stable handlebar setup, which is crucial when overcoming first obstacles.

Ergonomics and healthy posture

Adjustable elements ensure the bike adapts to the child's silhouette, not the other way around. Soft grips and smooth seat height adjustment guarantee comfort during every trip.

Energetic lemon-blue design

The combination of bright lemon and deep blue guarantees excellent visibility. The gradient effect on the frame gives the bike a sporty character that motivates discovering new routes.

FAQ: Parents ask, Cariboo answers

1. Do LITE tires need to be inflated?

Yes, these are classic pneumatic tires with a car-type valve (Schrader). Their advantage lies in low weight while maintaining full riding comfort.

2. Are LITE tires better than foam tires?

It depends on your needs! EVA foam is maintenance-free and record-light – ideal for the city. LITE tires in the MAX model are the choice for those who want extra cushioning on uneven surfaces while keeping the bike's weight low.

3. Why 3.6 kg and not less?

We could make a lighter bike, but we would have to remove the brake, rubber tires, and the solid handlebar stem. At 3.6 kg, the child has everything they need without losing that lightweight feel.

4. Is the brake too difficult for a 2-year-old?

The lever is designed for small hands and works very smoothly. Even if the child initially brakes with their feet, the presence of the brake allows them to get used to the mechanism they will find on every adult bike.

5. What height is the bike suitable for?

Thanks to the smooth adjustment of the saddle and handlebar, the Magnesium MAX fits children from approximately 85 cm to 110 cm tall.

6. Is the handlebar stem adjustable?

Yes, the A-head stem allows for height and tilt angle adjustments, making it possible to perfectly fit the bike to the child's arm reach.

Specification

Handlebar height	51 - 53,5 cm
Handlebar width	41,5 cm
Seat height	30 - 38 cm
Seat-handlebar distance	30 cm
Bike length	90 cm
Frame Material	magnesium alloy
Tyres	tube wheels
Wheel diameter	12"
Weight	3,6 kg
Age	2 - 5 years
Permissible user weight	30 kg
Colour	yellow, blue
Manufacturer	Cariboo
