

Comtura Prima TT

ABOUT PRODUCT

THE FASTEST.

TUFO Comtura Prima TT - Tubeless road tyre for maximum performance

The Comtura Prima TT is TUFO's fastest road tyre - designed for riders who don't want to compromise between speed, grip and reliability. Thanks to its innovative construction, premium materials and latest technologies, it sets new standards in performance. Weighing just 205 grams in the 700x28C variant, it still offers exceptional strength, stability and comfort while maintaining a low profile. Maximum contact with the road is ensured by our proprietary **Grip Compound**, which literally sticks to the surface - even in the wet - without compromising speed or pedalling efficiency. The result is a tyre that is uncompromising on descents, under acceleration or in challenging corners. The Comtura Prima TT thus combines outstanding handling characteristics with the confidence and reliability expected by professional and performance riders alike.

Main features:

Maximum grip in all conditions

Ultra low rolling resistance

Thanks to its high thread density (TPI) and carefully optimized construction, Prima TT achieves exceptional efficiency. The result is higher speed and less exhaustion during long rides.

Low weight for higher agility

At just 205 grams (28mm wide) it provides an excellent balance between lightness, comfort and handling. A great tire for fast races and agile training.

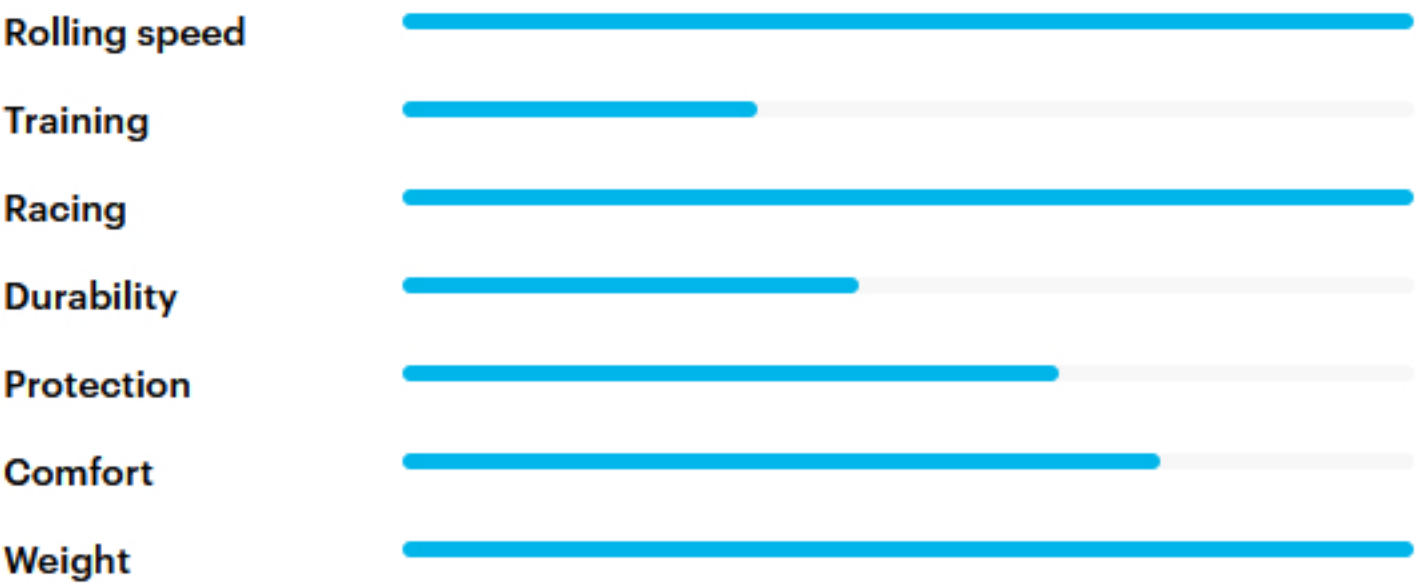

Nanostructure Silica Compound

Advanced nano rubber provides excellent flexibility, wear resistance and stable performance over a wide range of temperatures and conditions.

Comtura Prima TT is the choice for those looking for extreme speed without compromising grip and reliability. The perfect partner for racing ambitions and top training.
