TAN
SIDEWALLS

STRENGTHS

- Its versatile tread ensures safe riding on uneven roads while maintaining necessary performance on asphalt sections • Its high side studs provide grip on the wettest corners • 127 TPI construction combined with hardskin mountain bike technology, bead-to-bead reinforcement under the tread • 2 x 700 cross-sections that will delight users looking for performance as well as those looking for comfort • Usage ranging from gravel to bikepacking.

IN PRACTICE

The Touareg beats the Hutchinson Override when it comes to riding over rougher terrain. The Touareg's studs are more pronounced, bulkier, and spread over a wider cross-section. This guarantees protection and grip even on the most rugged terrain. The Touareg is designed to make the most of every moment off the beaten track while maintaining excellent performance on the road-for an extreme outing in terms of feeling and comfort.

ADVICE FROM A PRO

Francis CADE - HUTCHINSON AMBASSADOR

"The Touareg is a tire that offers excellent grip on rough terrain while maintaining excellent performance on the road - this is the tire made for gravel. The comfort-to-performance ratio really is perfect."

GRAVEL

CONCEPTS

TUBETYPE

DESCRIPTION

- Tubetype tire.

USE

- Competition and training

TUBELESS READY

DESCRIPTION

- Tubeless tire that require Hutchinson Protect'Air Max latex sealant to be airtight.

BENEFITS

- Safety: No tube to pinch-flat or bursts.
- Performance: Improved yield thanks to a better tire deformation. Greater lightness.
- Confort: Without a tube, lower tire pressure can be used without fear of a pinch-flat
- Particularly effective on challenging terrains.

USE

- Racing and training

HARDSKIN

Hardskin®, Textile grid reinforcement from bead to bead on the sidewalls and under the tread.

This technology is highly efficient against cuts, tears, holes and big impacts.

The Hardskin® is the essential partner for all riders seeking to avoid troubles.

REINFORCED+

Economical textile reinforcement from bead to bead that protects the sidewalls and the tread.
